probable membrane associated protein PFB0615c - malaria parasite (Plasmodium falciparum)

probable membrane associated protein PFB0615c - malaria parasite (Plasmodium falciparum)

C;Species: Plasmodium falciparum

C;Accession: C71610

C;Accession: C71610

C;Accession: C71610

C;Accession: C71610

C;Accession: C71610

C;Accession: C71610

C;Accession: C71610

Science 282, 1126-1132, 1938

A;Atitle: Chromosome 2 sequence of the human malaria parasite Plasmodium falciparum.

A;Accession: C71610

A;Accession: C71610

A;Status: preliminary; nucleic acid sequence not shown; translation not shown

A;Actus: DNA

lysosomal trafficking regulator, long splice form - mouse
NyAlternate names: beige protein homolog
C;Species: Mus musculus (house mouse)
C;Date: 22-Oct-1999 #sequence_revision 22-Oct-1999 #text_change 24-Nov-1999
C;Accession: T30851
R;Barbosa, M.D.F.S.; Tchernev, V.T.; Kingsmore, S.F.
R;Barbosa, M.D.F.S.; Tchernev, V.T.; Kingsmore, S.F.
B;Description: Two bg or not two bg? Longest isoform of mouse Lyst (beige) gene.
A;Recession: T30851
A;Accession: T30851
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ó.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  .

T13960 beige protein homolog - rat

RESULT 88

1204 SLKLIGE 1210

```
C;Species: Rattus norvegicus (Norway rat)
C;Date: 20-Sep-1999 #sequence_revision 20-Sep-1999 #text_change 20-Sep-1999
C;Accession: T13960
B;Mori, M.; Nishikawa, T.; Higuchi, K.; Nishimura, M.
Submitted to the EMBL Data Library, November 1998
A;Description: Deletion in the beige gene of the beige rat due to recombination between A;Reference number: Z17837
A;Accession: T13960
A;Status: preliminary; translated from GB/EMBL/DDBJ
A;Accession: T13960
A;Status: mRNA
A;Residues: 1-3788
A;Cross-references: EMBL:AB020019; NID:d1241953; PID:d1035670; PIDN:BAA34688.1

N;Contains: fibrinopeptide A
N;Contains: fibrinopeptide A
C;Species: Anas platyrhynchos (domestic duck)
C;Date: 30-Jun-1987 #sequence_revision 28-Dec-1987 #text_change 26-Jan-1996
C;Accession: JP0101
